1. Excludes utilities.

The returns and other characteristics of the allocation mixes contained in this presentation are based on model/back-tested simulations to demonstrate broad economic principles. They were achieved with the benefit of hindsight and do not represent actual investment performance. There are limitations inherent in model performance; it does not reflect trading in actual accounts and may not reflect the impact that economic and market factors may have had on an advisor's decision making if the advisor were managing actual client money. Model performance is hypothetical and is for illustrative purposes only. Model performance shown includes reinvestment of dividends and other earnings but does not reflect the deduction of investment advisory fees or other expenses. Clients' investment returns would be reduced by the advisory fees and other expenses they would incur in the management of their accounts.

For illustrative purposes only. The balanced strategies are not recommendations for an actual allocation. Indexes are not available for direct investment. Index performance does not reflect the expenses associated with the management of an actual portfolio. Past performance is not a guarantee of future results. Not to be construed as investment advice.

# World Market Capitalization

\$28.6 Trillion as of December 31, 2009

Where Dimensional Invests:

- Developed Markets
- Emerging Markets
- Not Invested

SCALE

In US dollars. Map reflects countries in the MSCI Provisional All Country World Index, MSCI All Country World Small Cap Index, and MSCI Frontier Markets Index. Market cap data is free-float adjusted. MSCI data copyright MSCI 2010, all rights reserved. Totals may not equal 100% due to rounding. Dimensional makes case-by-case determinations about the suitability of investing in each emerging market, making considerations that include local market accessibility, government stability, and property rights, before making investments. For educational purposes; should not be used as investment advice. 1. An example large cap stock provided for comparison.
